

SpaceLogic[™] RP Controller Expansion Modules

EcoStruxure[™] Building

0-10V light module without power distribution

Introduction

SpaceLogic* RP-C-EXT-0-10V-4 light module connects to the SpaceLogic RP room controllers and provides I/O expansion for 0-10V lighting control.

The 0-10V light module enables control of lights equipped with 0-10V ballasts.

Lighting can be controlled by the RP-C through motion detection and light intensity measurement provided by the Multi-sensor or by SpaceLogic Sensors connected to the RP-C. The 0-10V light module is part of the RP controller expansion modules for connected room solution and can be combined with other modules from this product range.

* Formerly known as SmartX.

Features

The 0-10V light module has the following features:

- Power and communications through the room bus
- Four light control outputs

- Four digital inputs for connection of light switches and window contacts. The digital inputs are SELV (Safety Extra-Low Voltage).
- Suitable for mounting in ceilings
- · Wieland connectors for quick and easy installation
- Engage mobile application for room comfort settings
- Status LED for the device
- Rotary switch for address configuration

0-10V lighting control

The analog interface has the following features:

- Independent control of each of the four outputs.
- The lights on each output belong to the same group and are thus controlled simultaneously (same ON / OFF / Dimming setpoint).

Room bus

The RP controller room bus allows RP controller expansion modules to be connected to the controller for people counting, motion detection, luminosity and sound pressure level measurements, Bluetooth Low Energy based applications, and control of electric lights and window blinds. The RP-C Pro controller room bus supports up to nine connected RP controller expansion modules with the following restrictions:

- Maximum of two DALI light modules
- Maximum of two SMI blind modules
- Maximum of seven Multi-sensor or Insight-Sensor devices

The RP-C Advanced controller room bus supports up to six connected RP controller expansion modules with the following restrictions:

- · Maximum of two DALI light modules
- · Maximum of two SMI blind modules
- Maximum of four Multi-sensor or Insight-Sensor devices

Maximum total length of the room bus is 72 m (236 ft).

Engage mobile application

The Engage mobile application enables control of room temperature, fan speed, lights, and blinds/shades directly from a smartphone. A user can manage these settings when the application is connected to the RP-C controller.

The Engage mobile application is free and available for download from Google Play and Apple App Store.

For more information, see the Engage Specification Sheet.

Part Numbers

Product	Part number
RP-C-EXT-0-10V-4	SXWRE010410001
DIN-RAIL-CLIP, DIN-rail end clip package of 25 pieces	SXWDINEND10001

Specifications

RP-C-EXT-0-10V-4	
Electrical	
Nominal voltage	100 to 277 VAC
Operating voltage range	+/-10 %
Frequency	50/60 Hz
Power consumption	10 VA
Room bus power consumption	0.3 W (24 VDC)
Overvoltage category	III.

Communication ports	
Room bus	RS-485 Dual RJ45 ports for daisy-chain configurations Use a Cat 5 (or higher) cable Maximum total length of the room bus: 72 m (236 ft)
Room bus protection	Transient voltage suppressors on communication and power signals
Hardware	
CPU type	ARM Cortex-M4 single-core
Frequency	80 MHz
SRAM (embedded)	320 KB
Flash memory (embedded)	512 KB
NOR flash memory	16 MB
Status indicator	LED (green and red) that shows the status of the device
Address switch	Rotary switch 0 to 9
Set button	Push-button switch
0-10V light outputs	
Outputs	4, Light 1 to Light 4
Output terminals	AOn (n: 1 to 4) and COM
Analog output voltage	0 to 10 VDC
Maximum source/sink current	10 mA per output
Digital inputs	
Inputs	4, DI1 to DI4
Range	Dry contact, 0 to 5.0 VDC, 2.2 mA, SELV (Safety Extra-Low Voltage)

Connections

Follow proper installation wiring diagrams and instructions. For more information on wiring, see the SpaceLogic Hardware Reference Guide.

RP-C-EXT-0-10V-4

Required External Connectors

Use	Part number	Reference	Connector type	Suitable for cable diametersmm (inches)	Marking	Color of coding / housing	Minimum order quantity
Power supply input	SXWRPCCON WWPOW	91.931.4053.1	Female	5.6–11 (0.22–0.43)	L, PE, N	Black /Black	100
Light outputs	SXWRPCCON WWLIGHT2	91.922.3353.0	Male	6–7.7 (0.24–0.30)	2, 1 2: AO14 1: COM	Light blue /White	100
Digital inputs	SXWRPCCON WDI	91.921.2353.0	Female	3.4–5.5 (0.14–0.21)	1, 2 1: DI14 2: RET	Light blue /White	100

The external connectors need to be ordered separately. The connectors can be ordered in quantities of 50 or 100 from Schneider Electric using the above part numbers. The

connectors can also be ordered directly from Wieland using the above reference numbers. For more information, see the Wieland Electric web site.

Regulatory Notices

FC

Federal Communications Commission FCC Rules and Regulations CFR 47, Part 15, Class B This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation.

Industry Canada This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
