

SpaceLogic Central I/O UI-8 Modules

Notice of Product Discontinuation

The SpaceLogic Central Input-Output (I/O) was introduced in 2015 to provide I/O points for the SpaceLogic AS-P server. An ASIC component which is used on the modules with 8-channel universal inputs (UI-8) has reached its end of life and is no longer being manufactured. Hence, we are forced to bring these SpaceLogic Central I/O UI-8 modules to their end of commercialization.

Based on the normal run rate of these modules, it is estimated that there will be enough stock of the UI-8 modules to fulfil orders until April 30, 2024. Therefore, effective May 1, 2024, any remaining SpaceLogic Central I/O UI-8 modules will be sold until stocks are exhausted. New and existing products from the SpaceLogic product ranges will serve as replacements. This announcement describes these replacement options.

Replacement Options

Direct Replacement

New Central I/O UI-8 modules designed with a modern ASIC component and enhanced features will serve as direct replacements. The enhanced UI-8 modules will have the same form factor and dimensions with identical I/O count and placement as the withdrawn UI-8 modules. They will be hot-swappable with the existing terminal base for the SpaceLogic Central I/O modules (SXWTBIOW110001) and will be backwards compatible with previous EcoStruxure Building Operation (EBO) releases.

These enhanced UI-8 modules will be introduced in the SpaceLogic Central I/O module product range in the fourth quarter of 2024. An announcement with additional details will be provided before these new and enhanced UI-8 modules are launched.

ANNOUNCEMENT AT A GLANCE

Product Announcement # PA-00919

- The SpaceLogic Central I/O UI-8 modules will reach their end of commercialization on April 30, 2024.

Recommended Replacements:

- Direct replacement products are the new SpaceLogic Central I/O UI-8 modules to be launched in Q4 2024.
- Alternative replacement products include the SpaceLogic Central I/O UI-16 module and the SpaceLogic Central I/O AO-8/ DO-FC-8/AO-V-8 modules.

Alternative Options

In the period between the discontinuation of the existing UI-8 modules on May 1, 2024, and the release of the new and enhanced UI-8 modules in Q4 2024, when existing UI-8 modules can no longer be supplied, you can consider these alternative products from the SpaceLogic Central I/O modules range and from the other SpaceLogic ranges of controllers and I/O modules as replacements. It is recommended you start as early as possible to redesign your systems to use these alternative products during this period as it might shorten the gap between the old modules becoming obsolete and the new ones being introduced.
